

Selfmate in 47 moves without  
making a capture

# CHESS PROBLEMS

*by* F. W. MARTINDALE

[ 1872 ]

An Electronic Edition  
Anders Thulin, Malmö · 2009-07-19

## PREFACE

In presenting to the Chess World the following Problems by our young friend, we desire to say: Frank W. Martindale was born Dec. 27th 1854, in Peterborough, N.Y., where he has resided ever since.

He commenced composing Chess problems in January, 1871, having learned the moves from Agnel's Book on Chess. Would that his little Book of Problems might stimulate others to the pure and invigorating mental treat Caissa ever offers her votaries!

O. A. BROWNSON, JR.  
Dubuque, Sept. 14th. 1872

## PREFACE TO ELECTRONIC EDITION

This edition of Martindale's *Chess Problems* is based on the original edition, published by O. A. Brownson, Jr., Dubuque, Iowa.

The main change from the original edition is that solutions have been converted from descriptive to algebraic notation as far as it was possible. It should perhaps be noted that the original edition did use the letter 'S' to indicate knight moves.

One problem has been modified. The original setting of problem 86 did not have a solution. However, as it seemed very probable that a white pawn had been omitted from the diagram, it has been added back in.

All problems up to four moves have been computer-tested for soundness, using Heiner Marxen's program *chest*. Any discovered errors have been indicated, in brackets, in the stipulation: [\*] indicates a problem that allows many solutions, [†] no solution, [§] a problem with short solution(s), and [?] some other error. Further details are given, also in brackets, in the solution.
